: *Andrias davidianus*

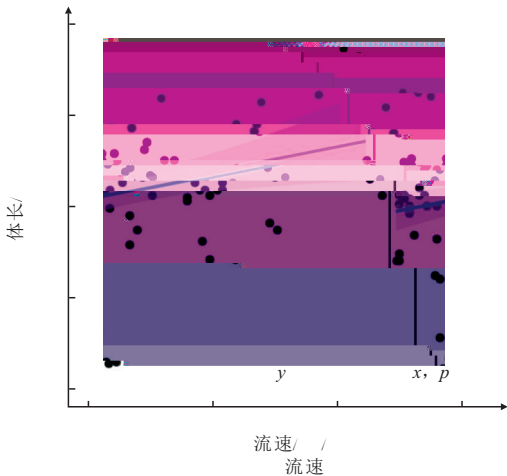

Key words : *Andrias davidianus*; Hunan Zhangjiajie Giant Salamander National Nature Reserve; activity rhythms; habitat utilization

Abstract: The activity rhythms and habitat utilization of *Andrias davidianus* were studied in the Hunan Zhangjiajie Giant Salamander National Nature Reserve. The results showed that the activity of *A. davidianus* was mainly concentrated in the morning and evening, and the habitat utilization was mainly concentrated in the forest and rocky areas. The study provides a basis for the protection and management of *A. davidianus* in the Hunan Zhangjiajie Giant Salamander National Nature Reserve.
